September 9, 2007

Deborah Taylor Tate  
Commissioner, Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Deborah Taylor Tate:

Dear Senators, Representatives, and  
FCC commissioners:

I'm a disabled retiree living below the poverty line.

Use of the internet (no longer a luxury but a necessity) has become my primary means of viable communications with family, friends and my financial and health service providers.

It is my main source of news, current affairs and health care information since off air television is severely limited in my location, and the cost of cable television exceeds the cost of dial up internet service.

Sincerely:

Robert R. Rudolph

\*\*\*\*\*

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks ([www.m2znetworks.com](http://www.m2znetworks.com)) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Robert Rudolph

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

There is a solution. All it takes is the will and determination to do it.

For every one of the negatives; i.e. internet porn, online predators, hackers, id thieves and the like, there are Americans whose use is perfectly legal and legitimate, and use the World Wide Web as a boundless source of information and services.

In closing, I cannot stress the importance of the freedom of expression that is the Internet, and that Broadband access is changing the way that we, as a society, make use of the Internet. It has become indispensable to so many of our society, and to stop an opportunity to add to the access of all Americans is wrong-headed as can be.

Please don't stand in the way of the progress that will bring Broadband access to millions of Americans

Please support M2Z today.

Sincerely,

Kenneth Schultz

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks ([www.m2znetworks.com](http://www.m2znetworks.com)) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Fidencio Campos

Deborah Taylor Tate  
Commissioner, Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Deborah Taylor Tate:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks ([www.m2znetworks.com](http://www.m2znetworks.com)) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

It is disgraceful how our country is so far behind many others when it comes to high-speed internet providers. Why is our government allowing our nation to fall so far behind, just to protect the interests of a very few?

Please support M2Z today.

Sincerely,

Bryan Law  
615-443-4467

September 8, 2007

Deborah Taylor Tate  
Commissioner, Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Deborah Taylor Tate:

The Internet has become a vital part of American life. We rely on web-based communication to learn, work, play and communicate on issues of importance to our communities. That is why all American families, schools, independent businesses and charitable organizations need access to Internet service that is fast, free and family-friendly.

America's future broadband infrastructure must allow families access to the benefits of the internet without requiring them to seek out indecency filters. Network providers should take a more active role in blocking indecent material online and help parents protect their children from the dangers of the Internet. Parents should not be expected to become computer experts in order to protect their children from online pornography and children should not be denied the learning opportunities available online because their parents fear they will be exposed to inappropriate content.

Implementation of a proposal now pending with the FCC, such as the one submitted by M2Z Networks ([www.m2znetworks.com](http://www.m2znetworks.com)) to provide a universal, free, fast, and family-friendly broadband service, is supported by the Coalition for Free Broadband Now and is a necessary step to protecting our children online while ensuring that all Americans have affordable Internet access.

This proposal could come at no better time, and I urge you to take action now to ensure it becomes a reality.

Sincerely,

Lynne Letizio

Becky Menn-Hamblin (beckymh@comcast.net) writes:

Hello, Chairman Martin -- I just realized that I didn't put my name or email address on my note to you a few minutes ago. I'm writing to each of the FCC commissioners in hopes that you will approve the idea that John Mulata(?) of M2Z has come up with to offer high-speed Internet options to everyone in the U.S. I think it is a fabulous idea and hope you'll consider what his plans are and how useful this would be to so many people, from poor to wealthy -- this \$45 a month and constantly rising bill from Comcast with no competition is killing me and I'm a professional who uses the 'net for my work! Thanks for considering this. Again, Becky :-)
